To Whom It May Concern;

You know what the right thing to do here is. It can't be about money. It's got to be about what's best for our water. Our city. Our environment. Our creatures. And the people who eat from and recreate it and on the water. The points are known. They are below. Consider your kids and your grandkids. We need to clean this up and leave it better than we found it.  
Sincerely, Carolyn Hintz. Portland resident.

The draft cleanup plan leaves far too much of the river contaminated for generations to come. We recommend that at least 1,000 acres of polluted sediment be removed from the river.

The draft cleanup plan relies too much on "monitored natural recovery," a "do nothing" strategy that leaves pollution in the river in the hopes that it will either be covered over or flushed downstream.

The Cleanup Plan must result in the removal of the Fish Consumption Advisory so that eating fish from the Lower Willamette is just as safe as eating fish from anywhere else in the Willamette River System and this must occur within a 10-20 year time frame.

Creating a toxic waste disposal dump in our river is not acceptable—toxic dredged sediments must be taken to an appropriate landfill.

Entities with liability for the pollution must be held accountable and pay for a comprehensive cleanup that will protect the health of our communities, our environment and our wildlife.
